NPIC Project J-120/63 (partial answer)

A newly identified hardened MRBM launch area (Figure 1), Aluksne MRBM Launch Area 3 (Lejasciems IRBM Launch Site 2), is located in Latvia, 3.8 nm SSW of Lejasciems and 20 nm SW of Aluksne. This hardened MRBM launch area and the two soft elongated-pad MRBM launch areas previously identified comprise the Aluksne MRBM Launch Complex.

This Type IV MRBM launch area contains a secured launch site with a mounded control bunker circumvented by a loop road serving the

two launch silos, which are positioned 225 feet apart; a probable portal silo located 260 feet to the west of the northern launch silo; and an unidentified structure located 260 feet to the west of the southern launch silo. The access road enters the launch site on an azimuth of approximately 90 degrees.

A site support facility, located approximately 5,000 feet WNW of the launch site, contains two buildings (150 by 40 feet) and at least seven other buildings (125 by 35 feet).
